Vitamin E	200

TRACE ELEMENTS (mg/kg)	
Zinc	3 600
Manganese	3 000
Copper	500
Iodine	60
Cobalt	18
Selenium	25

Sugars: 11%

PHYSIOLick advantages

- PHYSIOLick is made by an original process where the product is poured without heat or pressure. This gives PHYSIOLick better palatability, greater resistance to bad weather and a consistent texture.
- PHYSIOLick is practical and easy to use.
- CALYPAC is an exclusive and patented sealing system which insures perfect preservation of the product (only for 25 kg buckets).
- High content of sugar which contributes to the rumen microorganism activity all day long.

25 kg
or 125 kg tub

Instructions for use

Remove the CALYPAC film and leave buckets where animals congregate:

- 10 bovines per 25 kg bucket (30 per 125 kg tub), estimated consumption 100 to 150 g/day/head.
- 25 goats per 25 kg bucket (100 per 125 kg tub), estimated consumption 25 g/day/head.

Clean water must always be available.

Contact your ruminant technician for a specific recommendation.
